EDUCATION

- **Bachelor of Technology in Computer Science and Engineering(Artificial Intelligence)** 2023-27
Babu Banarasi Das University, Lucknow CGPA: 8.77
- **Class X** 2020
Brightland Inter College, Lucknow percentage: 74.33
- **Class XII** 2022
Brightland Inter College, Lucknow percentage: 72

PERSONAL PROJECTS

•To design antimicrobial minimalist mask for longer hours

Need for an advanced, long-wear mask that is anti-microbial, comfortable, breathable and sustainable.

- Tools technologies used: Nanotechnology, Coatings with biocide properties, Photoactive coatings, UV-sterilisation Layer
- Challenges of existing masks: Discomfort Contamination limited Wearability.
- Solutions: A minimalist anti-microbial mask for extended wear with built-in- biotechnology features.

Robo Dog

A smart robotic dog capable of obstacle detection, movement control, and real-time response using sensors and embedded systems.

- Designed and developed a robotic dog prototype for autonomous movement and environment sensing.
- Integrated ultrasonic sensors for obstacle detection and navigation.
- Implemented real-time control mechanisms for movement and decision-making.
- Worked on hardware-software integration, testing, and performance optimization.
- Technology Used: Arduino, IoT, Embedded Systems, Sensors, programming c.

House Price Prediction System

A machine learning-based system that predicts house prices using historical housing data.

- Collected and preprocessed housing datasets for analysis.
- Applied regression algorithms to predict property prices.
- Performed feature engineering and model evaluation.
- Visualized trends and insights using data visualization tools.
- Technology Used: Python, Pandas, NumPy, Scikit-Learn, Matplotlib.

EXPERIENCE

•Academic Projects & Self-Learning Experience

May - July 2023

Data Science & Artificial Intelligence Enthusiast

Online

- Actively learning Data Science, Machine Learning, and Artificial Intelligence concepts.
- Working on hands-on projects involving Python, Data Analysis, and Machine Learning.
- Practicing data preprocessing, visualization, and model development using industry-standard tools.
- Exploring Generative AI, NLP, and Deep Learning applications.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, C, Java

Libraries : Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Web Dev Tools: Leetcode, Arduino IDE, Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Frameworks: Scikit-Learn, TensorFlow (Basic), Keras (Basic)

Cloud/Databases: MySQL, MongoDB (Basic), AWS, Kaggle notebook

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning, Artificial Intelligence, Statistics for Data Science, cyber security

Areas of Interest: Data Science, Machine Learning, Artificial Intelligence, Cyber Security, Natural Language Processing, Generative AI, Data Analytics

Soft Skills: Problem Solving, Analytical Thinking, Self-Learning, Communication, Team Collaboration, Adaptability

ACHIEVEMENTS

- **Achievement** Achieved 3rd Position in a competitive hackathon among 120+ teams organized by Dr. Ram Manohar Lohia Institute of Medical Sciences, Lucknow Feb-Mar 2025
